Dear Reader:

The State of New Jersey has continued to maintain one of the safest ratio's of traffic fatalities in the nation for the year 1980.

The statistics indicate that the death rate for this period was 2.20 for every 100 million miles traveled.

Hopefully, the continued efforts and cooperation of the public and federal, state and municipal agencies will help us attain an even more desirable traffic safety record in future years.

The following pages contain statistics relating to fatal accident records of New Jersey, which were compiled by the Fatal Accident Unit of the New Jersey State Police.

Sincerely,

Clinton L. Pagano

M. ALCOHOL FACTOR

There were 1119 Fatalities during 1980. Of this total, 823 were tested for alcohol and 296 were not tested. The various reasons for those not tested were: delayed deaths; age factors; contamination of samples, and the failure on the part of some investigative agencies and medical examiners to cause tests to be performed on victims. Of the Fatalities, 561 were drivers; 257 passengers; 282 pedestrians and 19 pedalcyclists. Of the 823 tested, 479 were positive for alcohol in varying degrees and 344 were negative. Six were under the influence of drugs. This would indicate 58.2% of the fatalities tested were positive for alcohol and 41.8% were negative.

The attached chart is a breakdown of victims and the percentage of alcohol in each classification. An analysis of the chart by victim classification indicates the following:

1. **Drivers:**
   There was a total of 561 drivers killed, of which 469 were tested. Of those tested 293 were positive and 176 negative, for a 62.5% alcohol factor. Two were positive for drugs. The .15% and over period alcohol level, has the largest number listed. Of the 293 imbibing drivers, 225 or 76.8% had an alcohol level of .10% or higher.

2. **Passengers:**
   There was a total of 257 passengers killed, of which 137 were tested. Of those tested, 85 were positive and 52 were negative for a 62.0% positive alcohol factor. Three were positive for drugs.

3. **Pedestrians:**
   There was a total of 282 pedestrians killed, of which 208 were tested. Of those tested, 98 were positive and 110 negative for a 47.1% alcohol factor. One was positive for drugs.

4. **Pedalcyclists:**
   There was a total of 19 pedalcyclists killed. Nine pedalcyclists were tested for alcohol content. Of those tested, 3 were positive and 6 negative for a 33.3% alcohol factor.

SPECIFIC AREAS OF CONCERN

INTERSTATE HIGHWAY FATALITIES

The Interstate Highway System of New Jersey is approximately 80.88% completed. Of the 414.70 miles of roadway which are projected for this system, 335.41 miles have been opened to the motoring public. With this number of roadway miles open through a variety of areas such as rural, urban, flat, hilly, etc., an equal variety of accidents have become prevalent. Beyond the smaller "damage to property" type of accidents we are now encountering the non-repairable . . . the human fatality. Eighteen percent of the forty-six (46) fatal accidents which occurred during 1980 involved pedestrians. Forty-one percent of the accidents had alcoholic beverages contribute heavily towards causing the accidents. Over the twelve month span, the death rate averaged 4.09 deaths per month, and one death for every 6.8 miles of roadway. In order to have a clear, concise picture of the type and age of victim, as well as the manner and contributing factors of these fatal motor vehicle accidents, the following facts are outlined for you.

PUBLIC QUESTION #1

NATURAL RESOURCES BOND ISSUE

Should the "Natural Resources Bond Act of 1980" which authorizes the State to issue bonds in the amount of $145,000,000.00 for the purposes of testing, designing, acquiring, planning, and constructing resource recovery facilities, sewage treatment facilities, water supply facilities, dam restoration projects, and harbor clean up projects, providing the ways and means to pay the interest of such debt and also to pay and discharge the principal thereof, be approved?

INTERPRETIVE STATEMENT

Approval of this act would authorize the sale of $145,000,000.00 in bonds to be used for the development and construction of resource recover facilities, sewage treatment facilities, water supply facilities, dam restoration projects, and habor clean up projects. Several of these items are intended to convert waste products into useful materials, including metals, glass, paper, water, steam, and other energy resources or raw materials.
